Hitch Things, Inc.  
600 East Paper Mill Road  
Chambersburg, PA 17201

**Parts:**

- A: (2) Aluminum Tread Plates
- B: (1) Front Guide Rail Plate
- C: (1) Rear Guide Rail Plate
- D: (1) Receiver Tube w/ Mounting Plate
- 5/16 Bolts
- 5/16 Nylock Nuts

**(A) Aluminum Tread Plate****(B) Front Guide Rail Plate****(C) Rear Guide Rail Plate****(D) Receiver Tube w/ Mounting Plate****TOOLS NEEDED:**

- Allen wrench (included)
- 1/2" wrench or socket

**Assembly Instructions:**

1. Slide center square hole of part B (Front Guide Rail Plate) with the bent leg facing inward over the tube on part D (Receiver Tube w/ Mounting Plate), with mounting plate on the top. Align the 4 holes surrounding the square hole with the holes on the small mounting plates on either side of the tube. Insert (4) bolts and add nuts, but do **not** tighten.
2. Position part C (Rear Guide Rail Plate) at opposite end of part D (making sure bent leg is facing inward) and align with the 4 mounting holes in the center of the plate. Insert (4) bolts and add nuts, but do **not** tighten.
3. Place both of the aluminum tread plates, part A, with bent legs on the outside, pointing down on top of part D. Align holes in the mounting plate with holes along the flat edge of both parts A.
4. Place all bolts in holes before tightening.
